

Colour wheel diagram

Warm colours

Cadmium red
Cadmium yellow
Ultramarine

Cool colours

Alizarin crimson
Lemon yellow
Cobalt

Paint 2 colour wheels, 1 warm 1 cool.

It must be in the order as above.

Paint the Primary colours first – Red, Yellow and Blue.
Let it dry then paint the secondary colours. Orange, Green and Violet by mixing the colour together either side of the blank triangle yellow and red make orange, yellow and blue make green and blue and red make violet.

When you have completed the colour wheel you could try mixing more secondary colours by going from e.g. a very yellow green and gradually mixing in more blue and painting a small square of each mix as you add more colour. Then try mixing all 3 colours together to see what you get, many browns and greys. For a darker grey add more blue.
